STICKERS:

PRE-CUT PAGES :

pages 5-6 FOXES

- Detach both elements from the sheet of card.
- Fold each fox's body along the dotted line to form an accordion, as shown.
- Finally, fold their heads down.

pages 7-8 HEDGEHOG

- Detach all the different elements from the sheet of card.
- Fold inward along the two dotted lines so that the hedgehog can stand upright.
- If you haven't done so already, colour in the white part of the body, then bend the spines in different directions. Angle the ear slightly towards you.
- Stick the apple and/or the leaf somewhere on the hedgehog's body.

OWL **pages 9-10**

- Detach all the different elements from the sheet of card.
- Fold the owl's two side sections inward along the dotted lines so that they overlap each other.
- Turn your owl around so you can see its face.
- Fold the top section (the head) towards you along the dotted line, then thread it through the two slots between the eyes.
- Finally, angle the owl's feet forwards.

STARS

- Start by folding each yellow star in half.
- Unfold the star, then fold it in half again along another dotted line.
- Continue this process until you have five different creases.
- Force the parts of the creases leading to the star's points upwards and push the others downwards.
- Thread some ribbon through the hole in each star and hang your stars up.

These 2 titles offer a variety of crafts to be assembled using pre-cut elements, stickers and a blob or two of glue. Each time, the child can choose between the pre-coloured side or designing their very own creature.

These books will provide hours of entertainment!
