The Magic Book

Discover the books that enable Jade & Adam to shrink and spend a day with 4 small animals.

In front of the queen, Jade and Adam curtsy. "Please can you pass on a message to your parents: we need them to plant more flowers as we produce our honey from flower nectar."

"They also need to stop using toxic products in the garden - these kill us, you see." The queen offers them some honey and royal jelly.

Jade watches in wonder as a little caterpillar emerges from one of the eggs and gobbles up a leaf. "But this isn't a baby butterfly - it has no wings!" she says. "Be patient," says the butterfly.

"And what's this?" asks Adam eagerly. "It's a moult. A caterpillar sheds its skin several times before it reaches its full size," explains the butterfly. "Before I became a butterfly, I was a caterpillar too."

A red ladybird with seven spots appears in front of them. "Hello children! Let me show you around..."

The ladybird spreads her wings. "Jump on!" she calls, then takes off with Adam and Jade on her back.

- Immersive stories
- Enchanting nature
- Learn about familiar animals
