

LET'S DISCOVER OUR AMAZING WORLD!

Reference: S0192

After the tremendous success of our 2 first Atlases (Atlas of the World and Atlas of Europe), we have developed 2 new titles in this collection! One is based on the most recognisable animals around the planet while the other highlights the most famous wonders of the world.

We have kept the bestselling concept: illustrated maps and plenty of stickers (more than 100 per title) to be positioned in the books and on the posters.

Factual but not too serious, they will help children pinpoint and match continents with the corresponding animals or to place wonders of the world at the correct location around the planet.

The large poster map, coming along with each title, can be detached and hung on the bedroom walls of our budding globe trotters!
